INSTRUÇÕES PARA APLICAÇÃO

IMPORTANTER LER ANTES DE INICIAR A APLICAÇÃO

- Não é aconselhado usar qualquer tipo de amaciante para decais.
- De preferência use água isenta de cloro, pode ser mineral ou filtro. Caso seja de torneira, reserve um pouco em uma vasilha e deixe parada por uma hora para o cloro "evaporar" por completo.
- Recorte a figura desejada, pois o verniz aplicado é de camada única.
- A película é bem mais sensível que as de fabrica, então tente evitar de ficar "empurrando" o desenho de um lugar para outro, tente já coloca-lo na posição correta. Deixe a base úmida.
- Retirar com cuidado possíveis bolha de ar , usando cotonete ou algodão (ambos umedecidos)
- Depois aplicar os decais, use verniz para selagem de todos os decais no modelo.
- Quando estiver aplicando os decais NÃO coloque os dedos sobre algum decal que ainda esteja úmido. Ele ficará grudado no seu dedo e inutilizado.
- Não é aconselhado aplicar decais sobre bases foscas. Poderão causar efeito "silvering". Nestes casos usar tintas brilhantes e acabamento final em verniz fosco.
- Decais que contenham impressão em papel branco deve-se ser aplicada antes da transparente. Recorte exatamente a figura usando tesoura e/ou estilete.
- Quando aplicar verniz, sempre a primeira camada deve-se ser "fina". A reação do thinner usado como solvente com o decal pode causar danos a impressão. Use com cautela !

IMPORTANT READ BEFORE STARTING THE APPLICATION

- It is not advisable to use any softener for decal.
- Use water free of chlorine.
- Cut out the desired figure. The varnish is applied to single layer.
- The film is much more sensitive than the factory, so try to avoid getting "pushing" the design from one place to another, try to have put it in the correct position. The base should be wet.
- Remove air bubbles with possible care, using cotton swab or cotton (both wet).
- After applying the decals, use varnish to seal all the decals on the model.
- When applying the decals NOT place your fingers on any decal that is still wet. He will be stuck on your finger and unusable.
- Do not apply decals on matte board bases. May cause effect "silvering". In these cases use bright paint and final finish in matte varnish.
- Decals containing blank paper printing should be applied before transparent. Just crop the picture using scissors or knife.
- When applying varnish, always the first layer must be "thin". The reaction of thinner used as solvent with the decal can damage the print. Use with caution!
