

ALIASQTIP'S EXCLUSIVE ADVENTURE PACKS

MEDIEVAL COTTAGE
Adventure Pack #3

Includes:

- Medieval Cottage w/ Removable Roof
- Optional Window Transparencies

Instructions / Notes:

- Print all pieces onto standard cardstock except for the optional window panes. Those should be printed onto overhead transparencies.
- Cut out all of the pieces and, if desired, remove the three small windows from each wall section in order to replace them with transparencies.
- Score along the fold-lines to make folding easier. Reverse-score all fold-lines of the floor section, interior walls, and roof trusses.
- Glue exterior wall sections together and attach the floor piece. Glue transparent window panes into place at this time. Afterward, attach the interior wall sections.
- Glue the trusses $\frac{1}{2}$ " from the roof's edge along the center fold of the roof.
- Do not glue the roof onto the building. The roof is designed to be removed when moving figures in and out of the cottage.
- You may want to glue four pennies (one in each corner) to the bottom of the structure for added weight.
- Try making a cottage ruin by cutting away part of the structure and discoloring it with markers or colored pencils.
- Print out several to make a small village, place treasure glyphs inside, and prepare to be raided!
